

I just found out that the NAB is trying to stop XM from being able to carry traffic and news. I think this is absolutely absurd. Please, don't let that happen. I'm a big technology advocate. I think that letting the NAB have their way in this regard would be a step in the wrong direction. Let the local broadcasters compete on their own merits.

I love satellite radio. Don't put a damper on technological innovation.

I've also been a subscriber to DirecTV for over 7 years. I was one of the first few hundred thousand to use satellite television.

Thanks.
